## DETAILED ACTION

### *Drawings*

1. The drawings filed on December 5, 2003 are acceptable to the examiner as formal drawings.

### *Specification*

2. The disclosure is objected to because of the following informalities: A patent number should be inserted after "No." on page 1, line 5. If a patent number is unavailable then the expression "U.S. Patent No." on page 1, line 5 should be replaced by --pending--.

Appropriate correction is required.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: There appears to be no support in the specification for a membrane containing silver. The only discussion of silver in the specification is on page 31, line 12 where it is only stated that silver is one of many metals which may be employed for electroplating to fill tiny holes in the membrane. Perhaps, "silver" is supposed to read --silicon-- throughout the claims.

Art Unit: 1724

***Claim Rejections - 35 USC § 112***

4. Claims 1-70 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. There appears to be no support in the specification or showing in the drawings for a membrane containing silver. Furthermore, there appears to be no support for a membrane containing silver in the disclosures of the parent cases.

***Double Patenting***

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-70 (as best understood and assuming "silver" should read --silicon--) are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-76 of applicants' prior U.S. Patent No. 6,537,352. Although the conflicting claims are not identical, they are not patentably distinct from each other because the

Art Unit: 1724

claims apparently only differ in the order the secondary components (e.g. carbon, oxygen, silicon) are recited. Consequently, it would have been a readily obvious matter of choice to one of ordinary skill in the art to select one of carbon, oxygen, or silicon as the secondary component in applicants' patented claimed gas separation membrane.

***Conclusion***

7. The prior art made of record is considered pertinent to applicants' disclosure.
